

By means of the license agreement on the assignment of the right of use of trademarks enterprise _ _ _ _____ offers legal entities and individuals to use as Licensees trademarks GRABOVOI® and GRIGORI GRABOVOI®. The aim of use of the signs is the eternal development of each concrete man and humanity as a whole; therefore the technologies, which will be distributed under **class 16**, are ideologically oriented to realization of the eternal development.

With the assignment of the right of use of trademarks the Licensee is provided with training course on the Teachings of Grigori Grabovoi that enables the Licensee to conduct his activity on the basis of technologies of the eternal development. Individual technologies for the Licensee can be created after signing of amendments to the license agreements.

The rights of the use of trademarks on the following goods and the services are granted:

Paper, boxes of paper, table cloths of paper, table napkins of paper, cardboard and cardboard articles

Paper. This class is related to production of paper, which is required for printing of books and for office work, where duration of storage is one of the properties of paper. Including the possibility of use of the paper through electronic computers, which can identify the characteristics of the paper and, as if through the internal bar code of paper, classify information that is on it. In other words, special functions of paper will be inserted in the very structure of paper.

Paper boxes. This case refers to different types of the paper boxes, which will be distributed in different directions where they can be used and furthermore they will have an embedded function of building of different constructions from these boxes. They will also have one more embedded function, directed toward the fact that the form of these boxes will be reproduced and built in such a way that besides usual forms specific elements related exactly to perception of production of the eternal development will be embedded.

Paper catering accessories. This relates to design and fashion of the accessories that will enable a person, who perceives them as catering paper accessories, taking into consideration that the form of the catering accessories can be changed, perceive exactly the technologies of the eternal development using the forms and colors, which will be there. For the trade marks those forms and colors, which will contribute to the eternal development of man, will be provided.

Paper Catering napkins. The same as with the catering accessories. There will be different forms, and different colorings, and different material for the person who uses them to obtain a kind of implicit or probably explicit, if series of numbers are printed there, knowledge about the eternal development.

Cardboard and cardboard goods. This relates to the production of special cardboard, which can also possess properties of remote identification of it with its external scanning devices, and the issues of utilization, of course, will be solved automatically, or in other words, further movement of this cardboard. Goods from cardboard respectively can be those, which will be directed first of all toward the eternal development and will have

some knowledge. For example, the things that are related to children's creation, for, example, based on growth, within some age period of man; and further on as goods from which it is possible to make complex figures, which facilitate such thinking that is directed toward the eternal development. For example, in the form of intellectual games, intellectual systems, which can be built, and this assembling, these goods from the cardboard will be exactly made in such a way that when people will be building them according to the structure, embedded in the trade marks, they will obtain knowledge on the eternal development and realize this development.

Licensee with the use of class of 16 trademarks can obtain also rights to the use of methods, devices and systems described in the patents for inventions “The Method for Prevention of Catastrophes and the Device for its Realization” and “The System of Transfer of Information”.
